This course is designed for educators who envision the work of instructional design to be the work of justice and equity, as student variability should never be an excuse for student failure. In this short course, participants will develop fluency in the purpose and structure of the UDL framework while creating sample lessons and materials that identify and remove barriers to learning. Using asynchronous instruction, students can expect to engage in guided discussions about the framework and interactive design and feedback experiences regarding their own UDL-informed products.

How does school culture shape the day-to-day life of teachers and how do you identify a school culture that is right for you? How does the current emphasis on standardized testing impact the life of a teacher and how can teachers positively respond to this? What does it mean to be a "role model" and what are the challenges and opportunities presented by this social role? What does community mean and how are teachers participants in and facilitators of positive community?

This semester we will explore and discuss research and theory at the intersection of LS and other established disciplines (e.g., teacher education, informatics, science education, etc.). We will start with the minors of LS majors and majors of LS minors. The goal will be for each student to produce an annotated bibliography of the research and theory at this intersection, along with deep familiarity of the work of the leading researchers. If they wish, students should be able to complete the semester with unique review of the literature that is presentable and likely publishable. We will find a time when all registrants can meet synchronously each week in Zoom.
