This is an invitation only, small (50 students maximum) section of C117 that is intended for students who plan to continue to organic chemistry or other later courses in chemistry and would benefit from a more structured section. The course will use a student-led grading system which students will get credit for showing mastery of core and advanced topics, and the final grade will be determined by the number of topics students master. Students will be asked to commit to being a part of a vibrant and respectful learning community, to attending at least one office hour per week at any point that they are struggling, and to submitting work that accurately reflects their understanding of the material.

EVOLUTION AND ANALYSIS OF BRAIN-BODY-ENVIRONMENT SYSTEMS
Notions of embodiment, situatedness and dynamics are becoming increasingly important in cognitive science, converging on a view in which an agent's behavior and cognition are seen not merely as products of its brain alone, but rather as arising from the interaction between the agent's nervous system, body and environment. In order to evaluate the significance of these ideas, this course will examine the construction and analysis of models of complete brain-body-environment systems, with a particular emphasis on the use of tools from complex systems (including evolutionary algorithms, dynamical systems theory and information theory) to study how such coupled systems work. Behaviors to be examined range from basic motor behavior and sensorimotor learning to categorical perception, selective attention, agency detection and communication. We will also examine some of the broader implications of the brain-body-environment perspective for thinking about brain and behavior.

This is an experimental "flipped" version of Finite: before each recitation, students will be responsible for working through online tutorials on their own, and class time will be devoted to working problems. Attendance will be mandatory and part of the grade, with activities in every class. Except for the final exam, the exams will be show-your-work with partial credit (not multiple choice).

VT: PREPARING FOR LIFE AS A TEACHE
1016 PERM ARR ARR WB WEB Allen C
In this course, students will begin to explore the personal, institutional, political, and cultural forces that impact the lived experience of being a professional teacher
possible key questions for reflection include: how does self-knowledge help teachers positively shape their professional lives? how does school culture shape the day-to-day life of teachers and how do you identify a school culture that is rich for you? how does the current emphasis on standardized testing impact the life of a teacher and how can teachers positively respond to this? what does it mean to be a "role model" and what are the challenges and opportunities presented by this social role? what does community mean and how are teachers participants in and facilitators of positive community? exploration of these questions will occur through student-centered, hands-on, and interactive classroom activities.

through exploring research on resilience and the tools of neuroscience, awareness, and emotional intelligence, this course engages teacher education students in evidence-based practices and personal approaches to self-care. this course is a rich, intense and highly interactive experience.
above class meets second eight weeks only
above class is part of the school of education's professional distinction series.

educ-f 203 top exploration in education (1-3 cr)
v.t: prof dev for educators
10910, ARR ARR McCord E
above class is part of the school of education's professional distinction series.
this course is designed to assist the transformation from student to teacher. it allows students to delve more deeply into areas of interest by attending workshops and events in the school of education; often these experiences include learning from alumni teachers, principals, and other administrators who are currently in the field. taken entirely at the student's pace, the class includes attendance at live school of education professional development events (either in-person or on Zoom) followed by reflective writing submitted via canvas.
above class also requires additional mandatory participation in three in-person workshops. the days and times of those workshops can be found on career connections' workshops and training page here: https://tinyurl.com/yyxzvqz

v.t: preparing for life as a teacher
33567, ARR ARR WB WEB Allen C
in this course, students will begin to explore the personal, institutional, political, and cultural forces that impact the lived experience of being a professional teacher. possible key questions for reflection include: how does self-knowledge help teachers positively shape their professional lives? how does school culture shape the day-to-day life of teachers and how do you identify a school culture that is rich for you? how does the current emphasis on standardized testing impact the life of a teacher and how can teachers positively respond to this? what does it mean to be a role model and what are the challenges and opportunities presented by this social role? what does community mean and how are teachers participants in and facilitators of positive community? exploration of these questions will occur through student-centered, hands-on, and interactive classroom activities.
above class meets during the winter online session.
above class is part of the school of education's professional distinction series.

This course is about you and how to open up your individual creative potential. Guided by your curiosity and passion, you will explore your power to innovate through a series of workshops and a culminating final project. Along the way, you will discover how creativity can go beyond the arts to open up a world of possibility in any field: from science, medicine, and business to law, education, philosophy and beyond.

Above class meets first eight weeks only
Mapping Your Future: How to Make the Most Of Your College Experience is an eight-week, two credit, graded seminar course designed for students to investigate the purposes of an undergraduate education at IU Bloomington and to expose them to the array of skills, tools, and opportunities that academic advisors, career coaches, and the university have to offer. The assignments and activities in the course include a mixture of readings, class discussions, journaling, out-of-class-activities, and a culminating semester project. By the end of the course, students should have a better understanding of themselves, their academic and career interests, and a plan to maximize their opportunities as an IU Bloomington student.

TOPIC : Tackling Test Anxiety
33829 03:00P-03:30P TR ED 3015 Guest-Scott A
Are you dreading an upcoming test? Do you blank out or have trouble focusing every time you take a big exam? Are you frustrated because you consistently find that your scores don't match what you feel you really know? Preparing for an important professional school exam can be a daunting task. The MCAT, LSAT, etc. This course is all about evidence-backed strategies for taking your anxiety level down for any kind of test whether that be for professional school entrance exams or finals in your most difficult courses. Our approach centers on how to 1) apply the science of powerful learning to better prepare for important tests; 2) create effective schedules and habits for studying that stick; and 3) transform the emotions that come up before, during, and after the test to achieve your performance and professional goals.

In this course, students will develop a broad understanding of ideas and skills in history and the social sciences, as preparation for teaching social studies in elementary school. The focus of the course will be on the core ideas that children need to learn about history, geography, government, economics, and related areas, and the nature of their thinking and development in those areas. Above class can be subsequently taken for the Social Studies Studies. Welcome Civilizations or Social Studies Elective for the Early Childhood. Elementary or TAL programs.
