Above class will present research conducted with Native/indigenous communities in the Americas and in other national contexts. We will examine curricular movements generated by Native/indigenous communities, which include studying the emergence of language immersion programs and culture based educational programs. We will review the theoretical underpinnings for these curricular approaches and question the notion of self determination in Native nation contexts. Finally, we will seek to chart the ways in which research in indigenous contexts inform educational practices across global and western contexts.
