 Above class designed to help you prepare for upper-level Biology courses. Therefore, class time is used for collaborative, active, and inquiry-based activities meant to deepen your understanding of course topics and to provide practice in disciplinary thinking (e.g., visualizing biological processes, making predictions, drawing conclusions from data, and reading and analyzing scientific publications). Because students learn and retain information best when they are actively engaged during class, the structure of this course is flipped relative to that of a traditional classroom. There will be two, highly interactive, required class meetings per week. Before each class, you will view recorded lectures, participate on Canvas discussion board, read textbook and complete textbook-related online activities. Your out-of-class studies will be guided by video outlines and/or question banks. Our weekly three-hour sessions will include individual quizzes, team-based quizzes, team-based activities, and whole-class discussions.

Above class meets with SPEA-V 582

This is an O'Neill International course adapted to be offered in an online format. Students should be able to attend synchronous classes for the three weeks of the course.

Synchronous class sessions will run from 9am-11am or 10am-12pm every week day of the three week course. This course is taught in conjunction with the University of Augsburg (Germany) and participants will be in class with students from this university. This course is based around a required group project that spans the duration of the course, with a final deadline roughly a month after the last synchronous class session. Students will form groups with Augsburg students in order to complete this research project. Please be certain of your ability to fulfill all of the above conditions for the course before enrolling.
