The structure of the above class is blended/flipped relative that of a traditional class. Students are expected to invest time during the week watching lecture videos (~ 2-3 hours), completing the assigned readings, starting to learn new vocabulary and complete pre-class assignments (~ 2-3 hours) before coming to class. Submissions that will be required at regular intervals during the week (example Monday lecture assignment, Wednesday Lecture assignment) before class meets on Friday. Seek out assistance immediately when you need it during the week. Friday classes are active learning classes where students will engage in collaborative, active, and inquiry-based activities. These are designed to deepen understanding of course topics, practice disciplinary thinking and apply the material of the week to real world scenarios (drug design, scientific methods, and experimental strategies). Students are expected to come to class prepared and ready to engage with their teams We will assume that you have read the material before class.

<td>EVOLUTION AND ANALYSIS OF BRAIN-BODY-ENVIRONMENT SYSTEMS</td>
<td></td>
<td>Notions of embodiment, situatedness and dynamics are becoming increasingly important in cognitive science, converging on a view in which an agent's behavior and cognition are seen not merely as products of its brain alone, but rather as arising from the interaction between the agent's nervous system, body and environment. In order to evaluate the significance of these ideas, this course will examine the construction and analysis of models of complete brain-body-environment systems, with a particular emphasis on the use of tools from complex systems (including evolutionary algorithms, dynamical systems theory and information theory) to study how such coupled systems work. Behaviors to be examined range from basic motor behavior and sensorimotor learning to categorical perception, selective attention, agency detection and communication. We will also examine some of the broader implications of the brain-body-environment perspective for thinking about brain and behavior.</td>

TOPIC: Finite Mathematics for the Social and Biological Sciences
All students must have a Texas Instruments graphics calculator with advanced matrix capabilities: TI-83, TI-83 plus, TI-84, TI-84 plus, TI-85, TI-85, TI-86, TI-89, TI-92, TI Voyage 200, and the TI-Napire. The recommended calculator is the TI-83 plus
Above section will have an exam on Saturday, February 17, 10:00-11:30 am
Above class will have an exam on Saturday, April 6, 10:00-11:30 am
Above section will have an exam on Tuesday, January 23, 8:30-9:00 pm
Above class will be taught using hybrid, "flipped" pedagogies using both traditional and online methods
A portion of the above class is reserved for freshmen, sophomores, and juniors.

The purpose of this course is to teach students about business economic forces set in motion by digital technologies and their implications for business strategy. Analysis will be both theoretical and empirical, the latter incorporating econometrics and statistics to illustrate the pivotal role of data and prediction in strategic response. Lastly, we will study key aspects of digital market oversight both in the private and public sector. The course was developed and will be taught by Professor Jeff Prince. Professor Prince has a wide range of skills and experience concerning the digital economy, as evidence through leading research articles, service as the chief economist at the Federal Communications Commission, and expert testimony on major, multi-billion-dollar litigation.

BUS-M 355 TOPICS IN MARKETING (3 CR)
VT: BRAND MANAGEMENT PRACTICUM
9961 PERM 04:45 P-06:00 P TR HH 2055 King K 20 1 0
This practicum is geared toward students interested in a career in brand management or as a creative service provider for brands. The course offers students the opportunity to work on a real brand (preferably national) with teammates who offer a variety of expertise including strategy, design, and media. Students from the Kelley School of Business, The Media School, and the Eskenazi School of Art, Architecture + Design are encouraged to enroll. This team composition mimics what students will experience in their future jobs and hence, prepares them to see a business problem from a different lens and appreciate the diversity of views. This course provides students with a unique learning experience of applying the synergy of different talents, knowledge, skills, and perspectives to create effective strategies, tactics, and deliverables for a brand that can be implemented in the real world.
Application is required for enrollment:
https://go.iu.edu/4Qzb
Application deadline is October 15

PROFESSIONAL DEVELOPMENT (442)

EDUC-F 203  TOP EXPLORATION IN EDUCATION (1 CR)
VT: PREPARING FOR LIFE AS A TEACHER
9433 ARR ARR WB WEB Allen C 25 21 0
In this course, students will begin to explore the personal, institutional, political, and cultural forces that impact the lived experience of being a professional teacher
Possible key questions for reflection include: How does self-knowledge help teachers positively shape their professional lives? How does school culture shape the day-to-day life of teachers and how do you identify a school culture that is right for you? How does the current emphasis on standardized testing impact the life of a teacher and how can teachers positively respond to this? What does it mean to be a "role model" and what are the challenges and opportunities presented by this social role? What does community mean and how are teachers participants in and facilitators of positive community?
Exploration of these questions will occur through student centered, hands-on, and interactive classroom activities
Above class is part of the School of Education's Professional Distinction Series
Above class meets second eight weeks only

Above class is part of the School of Education's Professional Distinction Series.

This course is designed to assist the transformation from student to teacher. It allows students to delve more deeply into areas of interest by attending workshops and events in the School of Education; often these experiences include learning from alumni teachers, principals, and other administrators who are currently in the field. Taken entirely at the student's pace, the class includes attendance at live School of Education professional development events (either in-person or on Zoom) followed by reflective writing submitted via Canvas.

Above class also requires additional mandatory participation in three in-person workshops. The days and times of those workshops can be found on Career Connections' Workshops and Training page here: [https://tinyurl.com/yyvzzgwt](https://tinyurl.com/yyvzzgwt)

What can we learn from TikTok, advertisements, and movies? More broadly, how does the media depict race, gender, class, and sexuality as well as the intersection of these identities? In this course, you will learn how to creatively analyze and critique messages of power, knowledge, and social structures in media. You will also use innovative methods, such as poetry, photography, and collage to explore your identities and challenge taken-for-granted messages about race, gender, class, and sexuality.

**VT: MIND-BODY SKILLS GROUP**

**TOPIC:** Mind-Body Skills Group

In a highly interactive, small-group setting, explore and practice evidence-based mind-body techniques useful for intentionally connecting with your mind and body; regulating your autonomic nervous system (responsible for the "fight or flight" response); and tapping into your internal wisdom. Skills we will explore include: meditation (concentrative, expressive, and mindfulness), visualization, imagery, body scans, and more. No experience with the use of these skills is necessary. Come as you are, ready to learn about how these skills can be a valuable component of your personal wellness and self-care hygiene routine.

Mapping Your Future: How to Make the Most Out of Your College Experience is an eight-week, two credit, graded seminar course designed for students to investigate the purposes of an undergraduate education at IU Bloomington and to expose them to the array of skills, tools, and opportunities that academic advisors, career coaches, and the university have to offer. The assignments and activities in the course include a mixture of readings, class discussions, journaling, out-of-class-activities, and a culminating semester project. By the end of the course, students should have a better understanding of themselves, their academic and career interests, and a plan to maximize their opportunities as an IU Bloomington student.

TOPIC: Tackling Test Anxiety

Are you dreading an upcoming test? Do you blank out or have trouble focusing every time you take a big exam? Are you frustrated because you consistently find that your scores don't match what you feel you really know? Preparing for an important professional school entrance exam, the MCAT, LSAT, etc.?

This course is all about evidence-backed strategies for taking your anxiety level way down for any kind of test whether that be for professional school entrance exams or finals in your most difficult courses.
Our approach centers on how to 1) apply the science of powerful learning to better prepare for important tests; 2) create effective schedules and habits for studying so it sticks; and 3) transform the emotions that come up before, during, and after the test to achieve your performance and professional goals.

Above class meets first eight weeks only

TOPIC: Nutrition in the News!

In this discussion seminar, Nutrition in the News students will explore current topics reported in public media and use academic databases to discover the scientific underpinnings (or lack thereof) nutrition-related topics reported in the news, press releases, and other media. The course will begin with a short series of lectures orientating students to scientific writing, peer review, using academic databases such as PubMed, the scientific method, and what constitutes evidence. Then we will invert the course, with students reporting each week some nutrition-related news report, press release, advertisements etc. and the science that supports or does not support what you have read or seen. We will conduct weekly seminars on a variety of current nutrition topics in which students will present a paper of their choosing in a seminar topic of their choice. No textbooks and no tests.

According to Jonathan Rosenberg, former senior vice president of Google, Data is the sword of the 21st century, those who wield it well, the Samurai. In recent decades, survey data have become powerful swords that inform government policy making, business and nonprofit decision-making, political campaigns, legal decisions, and academic research in many fields of study. This course will give you the skills that you will need to harness the power of surveys: How do I select a sample? How do I design survey questions? How do I collect the data? As part of the class, students will be exposed to many real world survey examples. This is a rigorous, upper-level undergraduate class designed for those with an interest in research methods.

Statistics show that 90% receiving behavioral health care have a history of trauma (BHN.2021). In this course you will learn about the various types of trauma, how to identify it, the consequences of trauma and what it means to provide care through a trauma-informed lens. You will explore practical, hands-on ways of assessing and treating trauma. You will learn the importance of, and practice, self-care as a means to guarding your own mental health in order to continue to help those around you.

This course aims to examine the multilayer impacts on identity development in regard to sexual orientation and gender identity. The course objective aims to peel back the layers to delve into various aspects that limit or impact LGBTQ+ folks ability to live authentically. This course will explore and expand on various levels of impact through the ecological perspective while applying stages of development throughout the life of a person. This course is open to majors and levels while following professional expectations guided by the social work professional lens.
